Part of their ResearchKit suite of apps, Mole Mapper will help to gather data for Moles - American Academy of Dermatology Moles are a common type of growth on the skin. They often appear as small, dark brown spots and are caused by clusters of pigmented cells. Moles generally These conditions include moles, freckles, skin tags, benign lentigines, and seborrheic keratoses. Moles occur when cells in the skin grow in a cluster instead of being spread throughout the skin. These moles may be more likely to develop into melanoma (cancer) than are moles that Mole Define Mole at Dictionary.com The medical term for a mole is a NEVUS (mole is Latin for spot.). Nevi are the plural of nevus. Congenital nevi are moles present at birth; acquired nevi develop
