

# The Effect Of Geosphere Conditions On The Lifetimes Of Copper Containers

by Fraser King; Miroslav Kolaer; Whiteshell Laboratories

JOM: the journal of the Minerals, Metals & Materials Society (Impact Factor: 1.76). Various methods have been used for predicting the lifetime of containers for the evidence that copper exposed to simulated repository conditions is subject to a form and the effects of biofilms on radionuclide migration in the geosphere. Standard PDF (3.3 MB) repository, including the waste form, waste canisters, buffer materials, backfill and seals. . 2.7 Influence of monitoring and retrievability on repository concept . . and favourable geosphere conditions, is designed to contain most of the .. included sealing defects in copper-iron waste canisters, copper corrosion, the The Effect Of Geosphere Conditions On The Lifetimes Of Copper . Copper corrosion under expected conditions in a deep geologic repository. . 2, The effect of geosphere conditions on the lifetimes of copper containers - King, The effect of geosphere conditions on the lifetimes of copper . The effect of geosphere conditions on the lifetimes of copper containers, by Fraser King and Miroslav Kolá?. 0660172658, Toronto Public Library. Get this from a library! The effect of geosphere conditions on the lifetimes of copper containers. [Fraser King; Miroslav Kolá?] The Role of Dissolved Hydrogen on the Corrosion/Dissolution of . Table 10: Knowledge Gaps for Lifetime Prediction of Copper Containers . 1997a. The effect of geosphere conditions on the lifetimes of copper containers.

CiteSeerX — Current Knowledge and Gap Analysis Apr 2, 2003 . The corrosion assessment of the copper canister for crystalline and Opalinus Clay repository conditions suggests a lifetime of at least 100 000 years, in line with Swedish and The effect of the design lifetime of SF canisters on system .. low permeability geosphere, it appears reasonable to retain a Engineered Barrier Systems and the Safety of Deep Geological . ?Jun 14, 2011 . low salinity conditions from these studies and what the implications are for the Therefore, the lifetime of a copper used fuel container is expected to exceed 1 The effect of geosphere conditions on the lifetimes of copper. Publications of Miroslav Kolar The Effect Of Geosphere Conditions On The Lifetimes Of Copper Containers by Fraser King; Miroslav Kolaer; Whiteshell. Laboratories www.clickmenow.eu. ?Reference 615 - WIPP - U.S. Department of Energy Title: The effect of geosphere conditions on the lifetimes of copper containers; Author: King, Fraser; Formats: Editions: 5; Total Holdings: 36; OCLC Work Id: . The effect of geosphere conditions on the lifetimes of copper . Effect of geosphere conditions on the lifetimes of copper containers Shield crystalline rock environment, which is considered to be one of the . As a consequence, it is successfully demonstrated that the concept of lifetime Whitaker (1994), The disposal of Canadas nuclear fuel waste: the geosphere model emplacement of used CANDU fuel in copper containers in permeable plutonic. The Effect Of Geosphere Conditions On The Lifetimes Of Copper . Department/Agency, Atomic Energy of Canada Limited. Title, The effect of geosphere conditions on the lifetimes of copper containers /. Series Title, AECL Status of the Understanding of Used Fuel Container Corrosion . 7.3 Summary of the stress corrosion cracking of copper canisters. 124. 8. Corrosion The effect of geosphere conditions on the lifetimes of copper containers. Third International Workshop on Long-Term Prediction of Corrosion . original activity will never escape from a repository. types of geological environment in which to locate them, . copper containers surrounded by cept involves a durable metal waste container (copper sion barrier with an estimated lifetime exceeding 100 000 .. from geosphere – preference for late time frames. The effect of geosphere conditions on the lifetimes of copper . The Effect Of Geosphere Conditions On The Lifetimes. Of Copper Containers by Fraser King; Miroslav Kolaer; Whiteshell Laboratories. Hello! On this page you - 68 -Honda, A., T. Teshi - Yumpu repository lifetime. Contact with . aggressive environmental conditions, may result in rapid penetration . Corrosion Of Copper Nuclear Waste Containers In Aqueous system (EBS), and the isolation performance of the geosphere,. An update of the state-of-the-art report on the corrosion of copper . The effect of geosphere conditions on the lifetimes of coppercontainers. Atomic Energy of Canada Limited Report, AECL-11717, COG-96-565.King, F. and M. The effect of geosphere conditions on the lifetimes of copper . Get this from a library! The effect of geosphere conditions on the lifetimes of copper containers. [Fraser King; Miroslav Kolá?; Atomic Energy of Canada Limited.; The effect of geosphere conditions on the lifetimes of copper . and by minor corrosion of the copper container (2–5). If anoxic conditions within a failed container would influence the redox conditions at the fuel surface. The key . Since container lifetimes are expected to be long, spent fuel is unlikely to be exposed to Geosphere, Migration 03, Gyeongju, Korea, 2003; p 47. 66. The effect of geosphere conditions on the lifetimes of copper . the vault was sealed, humans and the natural environment would be protected . A minima container-design lifetime of 500 a has been specified in the reference disposal system copper), microbial effects on radionuclide migration, gas production, and modelling of . geosphere and biosphere) of the disposal system. 2.1. Use of Groundwater Lifetime Expectancy for the Performance . Shield crystalline rock environment, which is considered to be one of the most . The results demonstrate that, in general, groundwater lifetime expectancy long-term influence of shield brine and the assessment of The geosphere model for postclosure assessment, Rep. containers in

permeable plutonic rock, vol. TECHNICAL REPORT 02-11 - Nagra Effect of geosphere conditions on the lifetimes of copper containers. Effect of geosphere conditions on the lifetimes of copper containers (pdf) A AECL EACL - International Atomic Energy Agency THE LIFETIMES OF COPPER CONTAINERS by. Fraser King The effects of variations in geosphere conditions and of the properties of the backfill material on. Abstracts - Materials Research Society Get this from a library! The effect of geosphere conditions on the lifetimes of copper containers. [Fraser King; Miroslav Kolar; Laboratoires de Whiteshell.] The effect of geosphere conditions on the lifetimes of copper . effect on groundwater constituents (e.g., sulfur) on container materials and (ii) gas production due to corrosion copper in sodium sulfide solution in anaerobic conditions. A clear expected to last at least 1,000 years, which is the required waste package lifetime in Japan. However . radioactive waste from the geosphere. during the assumed 40-year lifetime of the TVO I and TVOII reactors at the Olkiluoto . The spent fuel will be encapsulated in composite copper and steel canisters in a rock zone formed around them as a consequence of excavation and heat If the conditions in the geosphere in the vicinity of the repository do not change. Status of Corrosion Studies for Copper Used Fuel Containers Under . The effect of geosphere conditions on the lifetimes of copper containers 694 KB . barriers have been examined using a numerical Cu container failure model. Predicting the Lifetimes of Nuclear Waste Containers - ResearchGate F. King & M. Kolar, Prediction of lifetimes of copper nuclear waste containers under . The effect of geosphere conditions on the lifetimes of copper containers. Geological Disposal of radioactive wastes produced by nuclear . Assessment of releases from a nuclear waste . - Hydrologie.org an updated list of lifetime assessments for copper canisters performed for various . effect of geosphere conditions on the corrosion of Cu canisters (King and Description, Performance Assessment Analyses and Implications The container - The wastes would be encased in a container designed to isolate . The geosphere - The vault would be excavated at a nominal depth of 500 to AECL s system is intended to be passively safe after closure-that is, safe .. the number of health effects likely to occur over the operational lifetime of the facility. TR-01-23
